

Derivada

$$\frac{d}{dx} (x^2 + 5x + 6)_{x=10}$$

$$2x + 5 \quad x=10$$

$$2(10) + 5 = 25$$

Integral

$$\int_1^3 x^3 + 4 dx$$

$$\left. \frac{x^4}{4} + 4x \right|_1^3$$

$$\left(\frac{3^4}{4} - \frac{1}{4} \right) + (4 \cdot 3 - 4 \cdot 1)$$

$$28$$
